- On or about January 13, 2007, through January 20, 2007, while employed as a Registered Nurse with Cross Country Staffing, Inc., Boca Raton, Florida, and assigned at Parkland Memorial Hospital, Dallas, Texas, Respondent withdrew Morphine, Midazolam and Butorphanol from the Medication Dispensing System (Pyxis) for patients without valid physicians' orders, as follows:

Respondent's conduct was likely to injure the patient in that the administration of Morphine, Midazolam and Butorphanol, could result in the patient experiencing adverse reactions.

8. On or about January 13, 2007, through January 20, 2007, while employed as a Registered Nurse with Cross Country Staffing, Inc., Boca Raton, Florida, and assigned at Parkland Memorial Hospital, Dallas, Texas, Respondent withdrew Morphine, Midazolam, Butorphanol, and Meperidine from the Medication Dispensing System (Pyxis) for patients, but failed to document, or accurately document the administration of the medications in the patients' Medication Administration Records (MAR) and/or nurse's notes as follows:

Patient	Date and Time Pulled	Medication Pulled	Time on MAR	Nurse's Notes	Waste	Physicians Order
2120007	1/13/07 12:01PM	Butorphanol SDV 2mg Vial	***Patient Discharged at 4:00PM on 1/12/07

3146659	1/20/07 8:24PM	Meperidine 50mg Syringe	None	None	None	Demerol 75mg IV x 1

Respondent's conduct above was likely to injure the patients in that subsequent care givers would rely on her documentation to further medicate the patient which could result in an overdose.

Patient	Date and Time Pulled	Medication Pulled	Time on MAR	Nurse's Notes	Waste	Physicians Order
2120007	1/13/07 12:01PM	Butorphanol SDV 2mg Vial	***Patient Discharged at 4:00PM on 1/12/07

3146659	1/20/07 8:24PM	Meperidine 50mg Syringe	None	None	None	Demerol 75mg IV x 1

Respondent's conduct was likely to deceive the hospital pharmacy and placed them in violation of Chapter 481 of the Texas Health and Safety Code (Controlled Substances Act).

10. On or about January 13, 2007, through January 20, 2007, while employed as a Registered Nurse with Cross Country Staffing, Inc., Boca Raton, Florida, and assigned at Parkland Memorial Hospital, Dallas, Texas, Respondent misappropriated Morphine, Midazolam, Butorphanol, and Meperidine from the facility and patients thereof, or failed to take precautions to prevent such misappropriation. Respondent's conduct was likely to defraud the facility and patients of the cost of the medications.
11. On or about January 19, 2007, while employed as a Registered Nurse with Cross Country Staffing, Inc., Boca Raton, Florida, and assigned at Parkland Memorial Hospital, Dallas, Texas, Respondent lacked fitness to practice professional nursing in that she showed signs of seizure or seizure like symptoms, was visibly shaking, and reported having auras. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
12. On or about April 9, 2008, while employed as a registered nurse with Presbyterian Hospital of

Denton, Denton, Texas, Respondent withdrew Nubian from the Medication Dispensing System for Patient Account Number 10197517 without a valid physicians' order as follows:

Patient	Date and Time Pulled	Medication Pulled	Time on MAR	Nurse's Notes	Waste	Physicians Order
D00010197517	04/09/08 2022	Nubain (1)	Not Noted as given on MAR, but Noted as a "Medication given in Labor" on the Delivery Summary	None	None	None

Respondent's conduct was likely to injure the patient, in that the administration of Nubian, without a valid physician's order, could result in the patient experiencing adverse reactions.

13. On or about May 7, 2008, while employed as a Registered Nurse with Presbyterian Hospital of Denton, Denton, Texas, Respondent engaged in the intemperate use of alcohol in that she submitted a specimen for a drug screen requested by Texas Peer Assistance Program for Nurses that resulted positive for Ethyl Glucuronide (614 ng/mL) and ETS (71 ng/mL). The use of alcohol by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patients condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
14. On or about August 5, 2008, while employed as a Registered Nurse with Presbyterian Hospital of Denton, Denton, Texas, Respondent engaged in the intemperate use of alcohol in that she produced a specimen for a drug screen requested by Texas Peer Assistance Program for Nurses that resulted positive for Ethanol (0.075%), Ethyl Glucuronide (>10000 ng/mL) and ETS (>1000 ng/mL). The use of alcohol by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patients condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
15. On or about August 25, 2008, while employed as a Registered Nurse with Presbyterian Hospital of Denton, Denton, Texas, Respondent engaged in the intemperate use of Alcohol in that she produced a specimen for a drug screen requested by Texas Peer Assistance Program for Nurses that resulted positive for Ethyl Glucuronide (304 ng/mL) and ETS (126 ng/mL). The use of alcohol by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patients condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
16. Respondent underwent a Forensic Psychological Evaluation with a Chemical Dependency Component on January 12, 2010, by Dr. J. Randall Price, ABPP, FACPN. Dr. Price states that Respondent admits that she took the medications from Parkland in an attempt to kill herself and stated that she didn't want to hurt anymore but just wanted to go to sleep. Dr. Price additionally states that Respondent's substance dependence screening reveals a probability for the presence of a history of substance abuse, but that she reported her last consumption of alcohol was in March of 2007. Dr. Price's conclusion and recommendation is that Respondent does not meet diagnostic criteria for a serious mental disorder, personality disorder, or substance dependence disorder at this time. Her dysthymic symptoms are mild, and she remains under the outpatient care of a psychiatrist.,

Dr. Price concludes that, there are no current conditions that would be expected to preclude her from being able to behave in accordance with Board Rules concerning generally accepted nursing standards and professional conduct. Additionally, Dr. Price states that it is likely that Respondent will be able to refrain from unprofessional conduct as defined by Board Rules.

17. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.

#### CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.555, the Board has jurisdiction over this matter.
