6. At the time of the initial incident, Respondent was employed as a Family Nurse Practitioner with San Antonio State Hospital, San Antonio, Texas, and had been in this position for one (1) month.

7. On or about December 2005, Respondent applied for and obtained, effective January 23, 2006, controlled substances registration with the Texas Department of Public Safety without first obtaining approval for prescriptive authority from the Board of Nursing, as required. Respondent's conduct was likely to deceive the Public.
8. On or about January 23, 2006, through October 2007, while employed as a Family Nurse Practitioner under the delegated supervision of James E. Soler, MD, San Antonio, Texas, Respondent prescribed and/or dispensed samples of dangerous medications and controlled substances to patients without approval for prescriptive authority from the Board of Nursing, as required. Respondent's conduct was likely to deceive the Public.
9. On or about October 14, 2008, while employed as a Family Nurse Practitioner in the United States Air Force, Washington, District of Columbia, Respondent's clinical privileges were revoked in response to "consistently displayed deficits in the ability to safely and effectively correlate and apply clinical knowledge, and lack of appropriate judgement skills required to comprehend and assimilate key aspects of the patient encounter necessary to synthesize safe and appropriate care planning. These deficiencies in both knowledge and reasoning could potentially result in missed diagnoses, improper management of patient conditions, medication errors, and subsequent harm to patients."
10. In response to the incidents in Findings of Facts Numbers Seven (7) through Nine (9), Respondent admits she applied for and obtained controlled substances registration with the state Department of Public Safety without first obtaining approval for prescriptive authority from the Board of Nursing as required. Respondent states she did not realize the mistake until receiving the letter of investigation from the State Board of Nursing which indicated that it was required to obtain Board authorization prior to registering with the Texas Department of Public Safety. Regarding the United States Air Force clinical privileges, Respondent states she was the victim of an ongoing saga where people waged a relentless campaign of professional assassination against her.
11. On or about June 2, 2010, Respondent underwent a Neuropsychological Evaluation conducted by Sean G. Connally, PhD. According to Dr. Connally, there is no clear evidence of any lateralized or localized dysfunctioning, other than some mild, global cognitive processing and memory dysfunctioning. However, any neurocognitive dysfunctioning does raise questions about extent of and affect on daily cognitive processing, especially in a demanding and stressful work environment. Dr. Connally believes that individuals with results such as Respondent can be at risk for concentration and attention span problems, particular difficulty in dealing with stress and pressure, being easily fatigued, and difficulties with multi-tasking and coping with being rushed or pressured. While these individuals have the intellectual resources for performing a variety of cognitive tasks, including clinical decisions, particularly familiar ones, speed and comprehensiveness of processing an array of information may be affected with difficulty following more than one instruction at a time. As a result, Dr. Connally recommends that Respondent have a period of supervision in a familiar clinical practice setting which utilizes Respondent's clinical experiences and expertise, and that this period of monitoring assist in making a final decision regarding her fitness to practice.

### CONCLUSIONS OF LAW
