

Respondent's nursing employment history continued:

2/2005-4/2008	LVN Charge Nurse	Keller Oaks Healthcare Center North Richland Hills, Texas
---------------	------------------	--

5/2008-Present	Unknown	
----------------	---------	--

6. At the time of the initial incident, Respondent was employed as a LVN Charge Nurse with Keller Oaks Healthcare Center, North Richland Hills, Texas, and had been in this position for three (3) years and one (1) month.
7. On or about March 30, 2008, while employed with Keller Oaks Healthcare Center, North Richland Hills, Texas, Respondent failed to assess the emergent care needed by Resident JE when the results of an x-ray, taken during the previous shift, were received indicating that the resident had a significant right hip fracture with deformity. Respondent failed to assess the resident's level of pain when it was reported to her by the Certified Nurse Aid that the resident was calling out as if she were in pain during personal care, and instead, Respondent assumed this was the resident's normal behavior. Respondent failed to notify the resident's physician of the x-ray results, thereby delaying the resident's transfer to the hospital by hours. Respondent failed to document in the resident's medical record the results of the x-ray or the signs of pain reported to her. The resident was transferred to the hospital by the next shift where the resident died nine (9) days later. Respondent's conduct was likely to injure the resident from non-efficacious care and may have contributed to the resident's subsequent demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the resident was sleeping and she saw no signs of pain or discomfort. The resident always yelled and fought during incontinent care and repositioning and then she would go right back to sleep. The resident had a history of falls, but had not fallen in the past couple of days. The Respondent had another nurse look at the x-ray results and the way it read lead them to think it was an old break that was healing. Respondent indicates that she felt the resident would need her rest to get through the ordeal that a trip to the hospital would be for her and that when she awoke in the morning would be a better time for her to go. Respondent indicates there was a note from the doctor to only call for emergencies at night. In conclusion, Respondent says she has learned from this experience. She says that no matter how well you know your residents and how fond you are of them, they are still your patients and not family, and so any and all changes of condition, now and in the future, will be reported to the doctor and to the family regardless of the time of day or night.
