BEFORE THE TEXAS BOARD OF NURSING

****

In the Matter of Registered Nurse	§	AGREED
License Number 651563	§	
and Vocational Nurse	§	
License Number 163220	§	
issued to ANGELA L. TROTTER	§	
f.k.a. ANGELA L. LEWIS EMENIKE	§	ORDER

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of ANGELA L. TROTTER, f.k.a. ANGELA LEWIS EMENIKE, Registered Nurse License Number 651563 and Vocational Nurse License Number 163220, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may have violated Section 301.452(b)(10)&(13) Respondent waived informal proceedings, notice and hearing, and agreed to the entry of this Order offered on April 5, 2010, by Katherine A. Thomas, MN, RN, Executive Director, subject to ratification by the Board.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the licenses.

2. Respondent waived informal proceedings, notice and hearing, and agreed to the entry of this Order.

3. Respondent is currently licensed to practice professional nursing in the State of Texas. Respondent's license to practice vocational nursing in the State of Texas is delinquent in status.

4. Respondent received a Certificate in Vocational Nursing from Lee College, Baytown, Texas, on May 1, 1997, and received an Associate Degree in Nursing from Lee College, Baytown, Texas, on May 1, 1998. Respondent was licensed to practice vocational nursing in the State of Texas on July 25, 1997, and was licensed to practice professional nursing in the State of Texas on June 23, 1998.

5. Respondent's nursing employment history includes:

1998 - 1999	Night Charge Nurse	Inova Cameron Glen Reston, Virginia
1999 - 2005	Staff Nurse	Inova Fairfax Hospital Falls Church, Virginia
8/05 - 6/06	Travel Nurse	Premier Healthcare Professionals Cummings, Georgia
5/06 - 12/06	Unknown	
1/07 - 11/07	Agency Staff Nurse	Independent Nursing Services Richland Hills, Texas
10/07 - 6/09	Staff Nurse	East Houston Regional Hospital/ Bayshore Medical Center Houston, Texas
6/09 - 11/09	Charge Nurse	Texas Specialty Hospital Houston, Texas
12/09 - Present	Agency Nurse	Pulse Staffing Houston, Texas

6. At the time of the initial incident in Finding of Fact Number Seven (7), Respondent was employed as a Staff Nurse with Bayshore Medical Center, Pasadena, Texas, and had been in this position for one (1) year and two (2) months.

7. On or about December 5, 2008, while employed with Bayshore Medical Center, Pasadena, Texas, Respondent miscalculated an intravenous (IV) Heparin dose and infusion rate which resulted in the administration of an overdose of heparin to Patient MR#291034. Respondent's conduct resulted in the patient experiencing symptoms of Heparin overdose including frank bleeding and prolonged PTT levels.

8. In response to Finding of Fact Number Seven (7), Respondent states she was not familiar with the Bayshore Medical Center nomogram because she had been transferred from East Houston Medical Center to Bayshore Medical Center as a result of Hurricane Ike and requested that another staff nurse assist her with the calculations. When Respondent went to the medication room to check the Accudose Medication Dispensing System to see if the heparin bolus was on the patient's profile, Respondent noted that the pharmacist had programmed 5 X 1,000 unit syringes for her to pull from the Accudose Medication Dispensing System instead of a 5,000 unit vial. Respondent asked the nursing unit pharmacist who explained that there were new JACHO rules regarding providing a nurse with the least amount of concentrations, which was why pharmacy sent five 1,000 unit syringes instead of one with 5,000. This pharmacist gave Respondent a 5,000 unit vial of Heparin, which Respondent used to administer to the patient. Respondent asserts that she had a staff nurse verify the pump setting before she started the pump to administer the Heparin to the patient.

9. On or about June 6, 2009, while employed with Bayshore Medical Center, Pasadena, Texas, Respondent failed to institute the appropriate nursing intervention to stabilize Patient V000715709 after receiving report of a critical lab value result of K+ "7.3". Consequently, the patient became non-responsive with a heart rate into the 60's, and required the initiation of a Code Blue to resuscitate the patient. Respondent's conduct deprived the patient of timely detection and medical intervention by the physician, to stabilize the patient, which may have prevented the patient from experiencing cardiac arrest, which may have resulted in the patient's demise.

10. In response to Finding of Fact Numbers Nine (9), Respondent denies any knowledge that the patient's potassium level was "7.3". Respondent was in report when the lab noted that they called the value to HDU9689, which is Respondent states is her user number for the computer, however is a number known by others on the floor and by the lab.

11. On or about June 6, 2009, while employed with Bayshore Medical Center, Houston, Texas, Respondent failed to verify that the Alaris infusion pump was administering intravenous Vasopressin to Patient V000715709 at the rate of 1 Unit/hr, as she programmed, before leaving patient's bedside. The physician had ordered that Vasopressin be administered to keep the patient's systolic blood pressure above 90, and unbeknownst to Respondent at the time, the Alaris pump delivered 60 Units/hour and the error was not detected until the pump's alarm sounded. Respondent conduct placed the patient at risk of non-efficacious treatment, which may have prolonged the patient's recovery.

12. In response to Finding of Fact Number Eleven (11), Respondent states that Patient V000715709 (a dialysis patient) coded, and the physician had ordered a vasopressin drip for low blood pressure. The pharmacy sent 100 units in 100 ml concentration. Respondent programmed the Alaris IV pump by choosing the shock mode, and entered 1 unit per hour, which was verified by another staff nurse. Approximately 45 minutes later, both of them heard an IV pump alarming and rushed into the room. The vasopressin drip was nearly completed with the exception of 30 mls left in the bag. Respondent contacted the pharmacy for a larger bag containing 30 units in 250 ml bag and while talking to the pharmacist, the charge nurse overheard her conversation and explained that there were pumps on the unit that would default to the GI bleed mode at 1 unit per min. Respondent states that the order for the Vasopressin read "start Vasopressin keep SBP>90 and the patient's BP did go as high as 127 but the diastolic never went above 68. When the first bag ended before it should have, a second one was started, as the BP started decreasing again. Respondent states that the Alaris pumps had been recalled for this issue of defaulting to another program, and that nursing staff were never alerted to this issue, so although the problems with the pumps are well known now, however, the administration of this hospital never made mention to nursing staff that the pumps had problems or that they had been recalled.

CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.555, the Board has jurisdiction over this matter.

2. Notice was served in accordance with law.

3. The evidence received is sufficient to prove violations of Section 301.452(b)(10)&(13), Texas Occupations Code, and 22 TEX. ADMIN. CODE §§217.11(1)(A),(B),(C),(M)&(P) and 217.12(1)(A) & (B)&(4).

4. The evidence received is sufficient cause pursuant to Section 301.452(b), Texas Occupations Code, to take disciplinary action against Registered Nurse License Number 651563 and Vocational Nurse License 163220, heretofore issued to ANGELA L. TROTTER f.k.a. ANGELA LEWIS EMENIKE, including revocation of Respondent's licenses to practice nursing in the State of Texas.
