Respondent's conduct was likely to deceive the hospital pharmacy and placed them in violation of Chapters 481 (Controlled Substances Act) and 483 (Dangerous Drugs Act) of the Texas Health and Safety Code.

10. On or about November 24, 2005, through 28, 2005, while employed with Houston Northwest Medical Center, Houston, Texas, Respondent misappropriated Morphine, Promethazine, Ambien, Xanax, and Tylenol #3, belonging to the facility and its patients thereof, or failed to take precautions to prevent such misappropriation. Respondent's conduct was likely to defraud the facility and patients of the cost of the medications.
11. On or about November 28, 2005, while employed with Houston Northwest Medical Center, Houston, Texas, Respondent lacked fitness to practice professional nursing in that she appeared tired and her affect was flat. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
12. On or about November 28, 2005, while employed with Houston Northwest Medical Center, Houston, Texas, Respondent engaged in the intemperate and/or unlawful use of Vicodin and

Xanax in that she admitted to using Vicodin and Xanax prescribed to family members. Possession of Vicodin and Xanax without a valid prescription is prohibited by Chapter 481 of the Texas Health & Safety Code (Controlled Substances Act). The use of Vicodin and Xanax by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patient's condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.

13. On January 11, 2010, Respondent presented for a psychological evaluation by J. Ray Hays, Ph.D., J.D., and Karen A. Lawson, M.P.H., Ph.D. Dr. Hayes states that there is no evidence from psychological testing that Respondent's personality is flawed or troubled such that she cannot appropriately perform the duties of a nurse. He states that results of the Substance Abuse Subtle Screening Inventory (SASSI) suggest that Respondent's profile was entirely within normal limits. There were no test findings or any interview findings which suggest that Respondent is impaired. While Respondent reported taking Vicodin after work on occasion, there is no report that this impedes her from performing her work duties as expected. Dr. Hays concludes that based on all the data obtained, "it is our opinion that (Respondent) is capable of working as a professional nurse." He adds that interview and test results do not suggest that Respondent has any impairment in her ability to act in accordance to the Board's rules and standards set in the Texas Administrative Code for nurses. Based on the interview and psychological test results, it is the opinion of the evaluators that Respondent is capable of avoiding behaviors that constitute unprofessional conduct in her work as a nurse.
14. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
15. Formal Charges were filed on September 2, 2009.
16. Formal Charges were mailed to Respondent on September 3, 2009.

CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.555, the Board has jurisdiction over this matter.
2. Notice was served in accordance with law.
3. The evidence received is sufficient to prove violation of Section 301.452(b)(9), (10) & (13), Texas Occupations Code, and 22 TEX. ADMIN. CODE §217.11(1)(B)(C)(D), and 22 TEX. ADMIN. CODE §217.12(4), (5), (6)(G), (10)(A)(C) & (11)(B).
