

Respondent's nursing employment history continued:

1/1990-12/1996	Nurse/PRN Baptist St. Anthony's Hospital Amarillo, Texas
12/1996-1/1998	Unknown
1/1998-3/2007	Family Nurse Practitioner Regence Health Network Tyler, Texas
3/2007-Present	Family Nurse Practitioner 24 th Street Clinic Amarillo, Texas

6. At the time of the initial incident in Finding of Fact Number Seven(7), Respondent was employed as a Family Nurse Practitioner with 24th Street Clinic, Amarillo, Texas, and had been in this position for approximately eight (8) months.
7. On or about August, 2007, through September 2007, while employed as a Family Nurse Practitioner with 24th Street Clinic, Amarillo, Texas, Respondent failed to adequately assess and evaluate Patient KM in that Respondent prescribed medications for hypertension and hyperlipidemia for said patient without obtaining baseline laboratory tests. Respondent's failure to establish baseline laboratory values exposed Patient KM to the risk of harm in that Respondent did not have a reference point from which she could establish the efficacy and/or adverse effects of the prescribed medication.
8. In response to Finding of Fact Number Seven(7), Respondent states that she provides services in a medically under served area where most patients are uninsured. Respondent adds that patient KM was uninsured and could not afford the cost of any laboratory tests. Respondent states that she felt that she needed to help this patient who had limited resources.
9. On or about August 2007, through September 2007, while employed as a Family Nurse Practitioner with 24th Street Amarillo, Texas, Respondent failed to adequately assess and evaluate Patient CB in that Respondent prescribed said patient a narcotic pain medication for back pain without ordering and/or utilizing any radiological tests. Respondent's failure exposed Patient CB to the risk of harm in that Respondent failed to confirm or rule out the root cause of Patient CB's back pain.

10. On or about August 2007, through September 2007, while employed as a Family Nurse Practitioner with 24th Street Amarillo, Texas, Respondent endangered the health of Patient CB in that Respondent prescribed "Norco 10/325 mg up to (4) tablets a day x (1) month," a narcotic analgesic, although said patient has a history of drug abuse. Respondent's action exposed said patient to the risk of continued substance abuse including a drug overdose.
11. In response to Findings of Fact Numbers Nine (9) and Ten(10), Respondent states that like most patients she attends to, Patient CM was uninsured and could not afford the cost of any radiological tests. Respondent states that the patient informed her that the cause of his pain was a "bulging disc" as diagnosed by a neurosurgeon at an earlier time. Respondent adds that she felt that she needed to help this patient by prescribing him pain medication. Respondent states that an MRI performed in September 2007, confirmed Patient CB's claim. Respondent states that she did not know, nor was she informed by anyone, that Patient CB was a substance abuser, and that she promptly discontinued any narcotic prescriptions to said patient once he exhibited drug seeking behavior.
12. On or about November 11, 2007, while employed as a Family Nurse Practitioner with 24th Street Clinic, Amarillo, Texas, Respondent inappropriately prescribed a stimulant "Adipex" to Patient JC in that said patient had a history of hypertension. Respondent's action exposed Patient JC to the risk of harm in that "Adipex" is contraindicated for Patients with hypertension.
13. In response to Finding of Fact Number Twelve (12), Respondent states that Patient JC vehemently denied any history of hypertension, and his blood pressure at Respondent's clinic reflects that it was not hypertensive. Respondent states that there is one elevated blood pressure reading taken at Respondent's clinic, but the patient insisted that it was an error by the digital machine at the clinic. Respondent states that the patient's family physician never found patient JC to be hypertensive.
