6. On November 27, 2006, Respondent was issued an Agreed Order by the Board of Nurse Examiners for the State of Texas that required Respondent to participate in and successfully complete the Texas Peer Assistance Program for Nurses (TPAPN). A copy of the November 27, 2006, Agreed Order, Findings of Fact and Conclusions of Law, is attached and incorporated, by reference, as part of this Order.

7. On or about April 13, 2007, through July 2, 2008, Respondent failed to comply with an Agreed Order issued to her on November 27, 2006, by the Board of Nurse Examiners for the State of Texas. Respondent's non-compliance is the result of her failure to comply with Stipulation Number Three (3) of the Order dated November 27, 2006, which reads:

(3) "RESPONDENT SHALL comply with all requirements of the TPAPN contract during its term."

Specifically, on or about April 13, 2007, through July 2, 2008, Respondent produced thirteen (13) dilute specimens for drug/alcohol screens.

8. On or about August 4, 2008, Respondent failed to comply with an Agreed Order issued to

her on November 27, 2006, by the Board of Nurse Examiners for the State of Texas. Respondent's non-compliance is the result of her failure to comply with Stipulation Number Three (3) of the Order, which reads:

- (3) "RESPONDENT SHALL comply with all requirements of the TPAPN contract during its term.

Specifically, on or about August 4, 2008, Respondent admitted to her case manager that she had taken Hydrocodone for a migraine headache.

9. On or about August 4, 2008, while employed as a Registered Nurse with Dell Children's Medical Center, Austin, Texas, Respondent engaged in the intemperate use of Hydrocodone in that she admitted to her case manager she had taken a Hydrocodone for a migraine headache. The use of Hydrocodone by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patient's condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
10. On or about December 22, 2008, while employed as a Registered Nurse with Baptist Health System-North Central, San Antonio, Texas, Respondent lacked fitness to practice nursing in that she showed signs of impairment, including but not limited to: swaying while standing and walking; slurred, rambling, slow, and incoherent speech; fumbling and slow movements, droopy eyes, with a sleepy/ drowsy demeanor, and dozing off during a staff meeting. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
11. In Response to Finding of Fact Number Seven (7), Respondent states that when she was made aware of the diluted specimens by her case manager she immediately made an appointment with her primary care physician and for a physical work-up to rule out any medical reasons for the diluted specimens. Respondent states that her physician changed her medications and for several months the change in medications seemed to be working. Additionally, Respondent states that she made huge attempts to try and remedy the diluted specimens, she changed her medications twice and went at all different times throughout the day to give the specimens in hopes to have different results based upon her fluid status. Additionally, Respondent states that at no time during the period in which she is referring did she have a positive specimen, she has never had a positive specimen and at that time she had been in the program for 22 months.

12. In Response to Finding of Facts Number Eight (8) and Nine (9), Respondent states that she had a migraine that induced vomiting, severe pain, and light and noise sensitivity. Respondent states that she medicated herself with the migraine medication that she had been previously prescribed, phenergan, relpax, and hydrocodone. Additionally, Respondent states that she did not review the handbook before she medicated herself and was under the impression that as long as she reported the medication to the appropriate person she was within her requirements. Respondent states that she was irresponsible and that her decision was poor and that she has been sober for 3 years, remains in AA, continues to attend meetings four (4) times weekly, and her recovery is strong and that she is always aware of her disease and the threat of a possible relapse.
13. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.

CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.555, the Board has jurisdiction over this matter.
2. Notice was served in accordance with law.
