

5. Respondent's vocational nursing employment history includes:

06/1991 - 1991	Staff Nurse	HCA Rio Grand Hospital McAllen, Texas
1992 - 07/1993		Unknown
08/1993 - 09/1993	Staff Nurse	Lynn Haven Nursing Home Corpus Christi, Texas
10/1993 - 03/2004		Not employed in nursing
04/2004 - 07/2005	Charge Nurse	Magnolia Place Health Care Liberty, Texas
08/2005 - 01/2008	Staff Nurse	The University of Texas Medical Branch - Correctional Managed Care (UTMB-CMC) Plane State Jail Dayton, Texas
02/2008 - Present	Staff Nurse	UTMB-CMC Travis County State Jail Austin, Texas

6. At the time of the incident in Finding of Fact Number Seven (7), Respondent was employed as a Staff Nurse with UTMB-CMC, Plane State Jail, Dayton, Texas, and had been in this position for two (2) years and three (3) months.

7. On or about November 7, 2007, while employed with UTMB-CMC, Plane State Jail, Dayton, Texas, Respondent failed to utilize the facility's established assessment protocol for inmates with complaints of shortness of breath, and consequently, failed to adequately assess Inmate Number 603764, including not listening to the inmate's lungs or taking her vital-signs. Respondent instead instructed the inmate to slow her breathing and released the inmate back to security. Respondent documented her nursing note entry using a "SOAP" format instead of the facility's approved assessment protocol format. Overnight, the inmate began to vomit and reportedly became shaky and weak, and shortly after being brought to the medical unit the next day, suffered cardiopulmonary arrest and expired. Respondent's conduct may have contributed to the inmate's subsequent demise.

8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that she received report of an inmate with shortness of breath and had the inmate sent to Medical to be triaged. Respondent states she "Observed patient in the waiting room, noted no difficulty with breathing. Upon entering waiting room to converse with patient, she began to take rapid breaths at first which then returned to normal as I talked with her. Noted no difficulty with respirations, no audible wheezing, no pallor, no cyanosis, patient able to speak clearly and appropriately, there was no alteration in mental status. ... Patient was given instructions to keep hydrated and submit sick call request or return to clinic should symptoms return or exacerbate during night. This was normal operations for walk in assessments to determine whether to proceed with nurse protocols, see as emergent or be addressed in a sick call request." Respondent further states she "also wrote name and number with housing location to follow up in A.M. on her status." Respondent indicates she followed up the next morning and with another nurse took a stretcher to get the patient. "During transport (the patient) became dysphasic, and mental status was altered. Patient was taken to the clinic Emergency Room and Provider called for assistance. She proceeded to go into cardiac arrest as we were obtaining VS (vital signs), making assessment and waiting for Provider. CPR was initiated, Provider summoned again, Automated External Defibrillator (AED) applied. There was no shock advised, CPR was continued. The finger stick blood sugar taken was within normal range, IV started, IV push medications administered without results. Patient was intubated and CPR continued. Emergency Medical Services (EMS) arrived and continued CPR until patient was pronounced dead on site."
