6. At the time of the initial incident, Respondent was employed as a Chief Nursing Officer with Hereford Regional Medical Center, Hereford, Texas, and had been in this position for eleven (11) months.
7. On or about November 16, 2007, while employed with Hereford Regional Medical Center, Hereford, Texas, Respondent administered Norcuron to Patient Medical Record Number 90543, who was not intubated. Norcuron is a potent neuromuscular blocking medication indicated for use only during surgery or in the management of patients who are being mechanically ventilated. Consequently, the patient stopped breathing and subsequently died. Respondent's conduct may have contributed to the patient's demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the physician handed him the medication he wanted to use and stated how he wanted it mixed. The drug was Norcuron. Respondent expressed to the physician that he was not comfortable using this medication but Respondent did not refuse to administer the medication. The physician gave an order to administer two (2) milligrams (mg) of versed, then gave an order to administer 5 mg of Norcuron. The medication was not completely effective so the physician gave an order to administer a second dose of versed 2 mg and a second dose of Norcuron 3 mg. When the patient's respiratory system became depressed, the physician ordered Narcan and Romazicon, which are reversal agents. A code ensued, the patient was intubated, placed on a ventilator and transferred to Amarillo via Lifestar after the patient was stabilized.
