

Respondent's professional nursing employment history continued:

7/1997 to 3/2006

RN/House Supervisor  
Pampa Regional Medical Center  
Pampa, Texas

3/2006 to Unknown

Registered Nurse  
Moore County Hospital District  
Dumas, Texas

6. At the time of the initial incident, Respondent was employed as a Registered Nurse with Moore County Hospital District, Dumas, Texas, and had been in this position for one (1) year and two (2) months.
7. On or about May 10, 2007, while employed with Moore County Hospital, Dumas, Texas, and providing nursing care to non-intubated Patient Number V00000417920 in the Intensive Care Unit, Respondent failed to intervene when orders were received to administer Diprivan, an anesthetic agent, to the patient. Per hospital policy, Diprivan is a drug that Registered Nurses are not to administer as it is not considered a conscious sedation drug, the patient is to be monitored continuously, and a physician must be at the bedside at all times as the patient is at great risk for losing their ability to maintain an open airway and to handle their own secretions. There was no physician at the bedside and the patient was not continuously monitored. Although Respondent was aware that Diprivan was not to be administered by a Registered Nurse, she allowed the medication to be administered by another nurse, and then maintained the patient on the Diprivan infusion. Respondent's conduct was likely to injure the patient in that he was heavily sedated and could have suffered respiratory failure and possible demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the patient was violent and agitated and that there were police officers at the bedside to help control him. The Charge Nurse received an order from the physician for Diprivan to sedate the patient, and Respondent told the Charge Nurse that she "thought Diprivan was one of the medications that nurses could not give and she was not going to give it." The Charge Nurse obtained the medication, administered the bolus via pump and then set it for a continuous infusion. Respondent further explains "I needed to be more insistent on not allowing the Charge Nurse to administer the medication. I should have called Dr. O., the anesthesiologist or the ER Doctor to give the medication. I also could have called the administrator on call or the nurse manager."
