WHEREFORE, PREMISES CONSIDERED, the Executive Director, on behalf of the Texas Board of Nursing, does hereby ratify and adopt the Agreed Order that was signed on the 12th day of August, 2010, by JAN TODD, Vocational Nurse License Number 151816, and said Order is final.

Effective this 23rd day of August, 2010.

Respondent's vocational nursing employment history continued:

10/95 to 2002	LVN CMS Home Health Coleman, Texas
1/18/01 to 11/2/04	LVN Brownwood Regional Medical Center Brownwood, Texas
11/04 to Present	LVN Coleman Medical Center Coleman, Texas
7/06 to Present	LVN Heritage Oaks Nursing Center Ballinger, Texas

6. At the time of the incidents in Finding of Fact Number Seven (7), Respondent was employed as a LVN with Brownwood Regional Medical Center, Brownwood, Texas, and had been in this position for three (3) years and eight (8) months.
7. On or about September 6, 2004, through September 12, 2004, while employed as a LVN with Brownwood Regional Medical Center, Brownwood, Texas, Respondent failed to accurately and completely document the nursing care provided to Patient Medical Record Number F000002322, a 100-year-old patient, as follows:
 - Although the patient required complete care, which included turning and repositioning every two (2) hours, Respondent documented periodically that the patient remained lying in the same position for up to six (6) hours at a time; and
 - On September 12, 2004, Respondent administered Kayexalate to the patient. Kayexalate is a medication to lower serum potassium level which often results in patients developing diarrhea. Although Respondent documented the patient was incontinent of stool twice after receiving the Kayexalate, Respondent did not document the status of the patient's skin to the buttocks. The subsequent nurse noted that the patient had reddened buttocks with a blister, and noted redness to the patient's ankle at 8:00 p.m. Within several hours the patient had skin breakdown with open sores to the buttocks and right ankle area. The patient was discharged to the nursing home on September 13, 2004, with open sores that required additional treatment.Respondent's conduct resulted in an inaccurate medical record and exposed the patient unnecessarily to a risk of harm in that subsequent caregivers would have relied on her documentation while providing further care to the patient.
8. In response to the incidents in Finding of Fact Number Seven (7), Respondent states that her documentation was not completely accurate with regards to documentation of position changes that she performed. In addition, Respondent states that the patient was developing redness to the buttocks and that she reported this to both the physician and the charge nurse. When the physician stated that the patient still needed the Kayexalate, Respondent states she again spoke with the charge nurse as they knew the patient would develop diarrhea. Respondent states she reported the administration of Kayexalate to staff of the following shift, and that when Respondent left, the patient had redness to the buttocks, but that there were no open areas and the patient's heels were elevated and unchanged.
