Respondent's conduct was likely to injure the patients in that the administration of Demerol in excess frequency and/or dosage of the physician's order could result in the patients suffering from adverse reactions including respiratory depression.

8. On or about May 3, 2005, to June 28, 2005, while employed with Park Plaza Hospital, Houston, Texas, Respondent withdrew Demerol, Ativan, Xanax and Morphine from the facility's medication dispensing system for patients but failed to accurately and/or completely

Respondent's conduct was likely to injure the patients in that subsequent care givers would rely on her documentation to further medicate the patient which could result in an overdose.

9. On or about May 3, 2005 to June 28, 2005, while employed with Park Plaza Hospital, Houston, Texas, Respondent withdrew Demerol, Ativan, Xanax and Morphine from the facility's medication dispensing system for patients but failed to follow facility policy and procedure in place for the wastage of medications. Respondent's conduct was likely to deceive the hospital pharmacy and placed them in violation of Chapter 481 of the Texas Health and Safety Code (Controlled Substances Act).
10. On or about May 3, 2005 to June 28, 2005, while employed with Park Plaza Hospital, Houston, Texas, Respondent misappropriated Demerol, Ativan, Xanax and Morphine belonging to the facility and patients thereof, or failed to take precautions to avoid such misappropriation. Respondent's conduct was likely to defraud the facility and patients of the cost of the medication.
11. On or about June 28, 2005, while employed with Park Plaza Hospital, Houston, Texas, Respondent may have lacked fitness to practice professional nursing in that she was observed exhibiting a dazed appearance. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
12. At the time of the incidents in Findings of Fact Numbers Thirteen (13) and Fourteen (14), Respondent was employed as a Registered Nurse with Select Specialty Hospital, Houston, Texas, and had been in this position for one (1) year and one (1) month.
13. On or about August 4, 2006, while employed with Select Specialty Hospital, Houston, Texas, Respondent lacked fitness to practice professional nursing in that she was observed exhibiting characteristics of impaired behavior including, but not limited to: slurred speech, unsteady gait and an inability to complete sentences in response to direct questions. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
14. On or about August 4, 2006, while employed with Select Specialty Hospital, Houston, Texas, Respondent misappropriated narcotics belonging to the facility and patients thereof, or failed to take precautions to prevent such misappropriation, in that she was observed with multiple schedule II narcotics in her coat pocket, including two (2) Vicodin. Respondent's conduct was likely to defraud the facility and patients of the cost of the medications.
15. Regarding the conduct outlined in Finding of Fact Number Thirteen (13), Respondent states

that she was taking medications for post-partum depression and that any strange behavior at work was due to lack of sleep from caring for her baby.

16. On April 11, 2007, Respondent submitted to a forensic psychological evaluation conducted by Joyce M. Gayles, Ph.D. Dr. Gayles concludes that Respondent has been diagnosed with and is being treated for Post-partum Depression. Respondent shows no signs of clinical depression at this time, and results from the SASSI-3 indicate she has a low probability of a Substance Dependence Disorder.

Dr. Gayles recommends that Respondent continue to receive psychological counseling and medication for depression for a period of at least eighteen (18) months, with written verification of treatment and progress provided by Respondent. Should Respondent remain in treatment and continue to recover from her depression, Dr. Gayles believes she could be expected to perform the duties and responsibilities of a professional nurse based on the requirements of Rules 213.27-213.29 and 217.11 at 22 Texas Administrative Code and consistently avoid unprofessional conduct as stipulated in Rule 217.12 at 22 TAC.

Dr. Gayles adds that Respondent is likely to perform best if she works in relatively low stress and more routine nursing environments and would not do well in high stress and/or unpredictable situations. Respondent could also benefit from additional training in standard nursing and hospital practices in regard to waste of medication and documentation of administration of medication.
