On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of CHARLA HEATHER TAGLE, Registered Nurse License Number 6801 hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may have violated Section 301.452(b)(10) & (13), Texas Occupations Code. Respondent waived representation by counsel, informal conference, notice and hearing, and agreed to the entry of this Order offered on September 21, 2008, by Katherine A. Thomas, MN, RN, Executive Director, subject to ratification by the Board.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license.
2. Respondent waived representation by counsel, informal conference, notice and hearing, and agreed to the entry of this Order.
3. Respondent is currently licensed to practice professional nursing in the State of Texas.
4. Respondent received a Diploma in Nursing from the Methodist Hospital, Lubbock, Texas, on June 1, 2001. Respondent was licensed to practice professional nursing in the State of Texas on July 24, 2001.

5. Respondent's nursing employment history includes:

7/01 - 11/03	Cardiac Cath Lab Circulator Staff Nurse
11/03 - 2/05	Emergency Staff Nurse Covenant Medical Center Lubbock, Texas

4/07 - 5/07	Unknown
6/07 - 2/08	Cardiac Cath Lab Staff Nurse Clear Lake Regional Medical Center Webster, Texas
33/08 - present	Unknown

6. At the time of the incident in Finding of Fact Number Seven (7), Respondent was employed as a Cardiac Cath Lab Staff Nurse with Clear Lake Regional Medical Center, Webster, Texas, and had been in this position for four (4) months.
7. On or about October 10, 2007, while employed with as a Cardiac Cath Lab Staff Nurse at Clear Lake Regional Medical Center, Webster, Texas, Respondent failed to properly administer injections for a ventriculogram to Patient Number 280596. Respondent failed to raise the tip of the power injector and expel any potential air in the syringe prior to injection. Respondent's conduct resulted in the patient receiving an undetermined amount of air, suffering an air embolism to the saphenous vein graft to the right coronary artery and a cranial air embolism. Patient Number 280596 had to be transported to another facility for medical management where the patient subsequently expired.
8. Respondent attributes several factors to the incident in Finding of Fact Number Seven (7). Respondent states that the physician's behavior was a contributing factor because he was difficult to work with, was demeaning, would yell and would not allow time to troubleshoot a problem. Furthermore, Respondent's attributes her lack of orientation to the Medrad system has another contributing factor. Respondent states that although she is an experienced cath nurse, this was the first position that utilized the Medrad system. Lastly, Respondent states that she feels that the machine may have malfunctioned because the physician liked a test/puff injection prior to the main injection and when she gave the first test puff, the injection came out abnormally fast. When Respondent retested, their appeared to be more volume and more force than normal. Respondent denies that she did not verify air placement in the injector prior to the injection of contrast, because the injector had been tapped and banged to remove any air that was collecting around the base.
