Time off to address medical-legal matters

6. On or about June 8, 2005, while utilizing her Texas Registered Nurse license and working under her multi-state licensure privilege through Medical Contracting Services, Inc., Dallas, Texas, on assignment at Delta Regional Medical Center, Greenville, Mississippi, a pre-employment drug screen yielded a positive result for various prescription medications based on the presence of metabolites including those typically seen for Oxazepam, Codeine and Morphine.
7. The use of controlled substances by a nurse, either as prescribed or inappropriately taken, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patients' conditions, and could conceivably impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care.
8. Respondent has stated and her medical records reflect, that among other ailments, she suffers from a chronic connective tissue disease and it is her understanding that she will "always be on medications" of some sort for pain, inflammation, or related symptoms.
9. Respondent maintains that she has never worked while impaired and is "fully functional" with the medications she takes during "flare-ups" of her disease. No evidence has been provided to the Texas Board of Nursing showing that Respondent was actually impaired in June of 2005 or subsequently, and there are no known incidents of patient harm by Respondent.
10. Christopher Penning, D.O., has been Respondent's primary care physician for more than a decade, and stated in writing that the June 2005 drug screen results were consistent with Respondent's prescribed medications. Dr. Penning is a licensed Texas physician with board certification in Family Practice by the Bureau of Osteopathic Medical Specialties and has held that certification since 1999. Dr. Penning has never reported Respondent to the Board of Nursing as suffering from a condition that would prevent Respondent from safely practicing as a nurse.
11. Respondent was referred to and evaluated by Robert Alan Moore, M.D. in 2008. Robert Alan Moore, M.D., is a licensed Texas physician with over 31 years of medical practice experience, and is board certified by the American Board of Anesthesiology with a primary practice area of pain management. After evaluating Respondent, Dr. Moore concluded in March of 2008 that "If we are able to decrease her pain level sufficiently she is willing to stop the pain medications. In the meantime, I see no reason that her pain medications would interfere with her profession of nursing."
12. In the fall of 2006, at the recommendation of Board of Nursing staff, Respondent underwent a forensic evaluation by Board approved psychologist Rion Hart, Ph.D., which included a chemical dependency component. Rion Hart, Ph.D., stated in his evaluation report on Respondent that, "Until she receives whatever treatment as indicated by a psychiatrist, I could not conclude that [Respondent] would be able to consistently behave in accordance with Board rules." In his a subsequent sworn statement on May 28, 2009, Rion Hart, Ph.D., conceded that he could not say Respondent was unable to conform her nursing practice to the governing law of the Texas Board of Nursing.

13. Rion Hart, Ph.D. stated in his evaluation report that there was no apparent gross disturbance in Respondent's thought processes and that self report measure testing showed a low probability of Respondent having an existing substance dependence disorder. Rion Hart, Ph.D., has testified that he has not tendered a diagnosis of Respondent, and would not be comfortable doing so, and has further indicated that Respondent should be seen by a psychiatrist to receive whatever treatment is indicated.

14. Edward B. Gripon, M.D., is a licensed Texas psychiatrist. Dr. Gripon is board certified as a Diplomate in Psychiatry of the American Board of Psychiatry & Neurology with added qualifications in Forensic Psychiatry. Dr. Gripon evaluated Respondent in 2007 and indicated in his notes on May 2, 2007 that, "I do not think that she has any condition which would prohibit her from continuing to function as a nurse." On or about May 2, 2007, through October 16, 2007, Respondent was examined four (4) times by Edward B. Gripon, MD, who has stated that he does not think that Respondent has any condition which would prohibit her from continuing to function as a nurse, and that she can safely continue her nursing duties.

15. On March 19, 2008, Respondent was examined by R. Alan Moore Jr., MD, whose primary practice is in Pain Management. Dr. Moore noted that "we will proceed with a diagnostic/therapeutic cervical steroid injection" and will see Respondent following the injection to evaluate the results, and plan future therapy on that basis. Dr. Moore subsequently noted that if they are able to decrease Respondent's pain level sufficiently then she is willing to stop the pain medications. He further noted in his records that he sees no reason that her pain medications would interfere with her profession of nursing.

16. Respondent has continued to regularly receive care and treatment through Dr. Penning, and through Dr. Gripon and Dr. Moore on an as needed basis. All prescription medications for Respondent are issued and managed by Dr. Penning, and Respondent has limited her pharmacies to a local pharmacy and the Walgreen's system in an effort to ensure safe medication management and address any possible concerns about Respondent's access to and use of the medications.

17. The Board finds that there may be potential risks to public health and safety as a result of possible medication use and management of Respondent's illnesses.

CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.555, the Board has jurisdiction over this matter.
2. Notice was served in accordance with law.
3. The evidence received is sufficient to take regulatory action under Section 301.452(b)(12) Texas Occupations Code, and 22 TEX. ADMIN. CODE §217.12(10)(A) due to a mental or physical condition requiring prescription medications.
4. The evidence received is sufficient cause pursuant to Section 301.452(b), Texas Occupations Code, to take regulatory action in regard Registered Nurse License Number 577114, and Vocational Nurse License Number 123716, heretofore issued to DORMA BRANDON BRONES, including revocation of Respondent's licenses to practice professional and vocational nursing in the State of Texas.

BEFORE THE TEXAS
BOARD OF NURSING

FORMAL CHARGES

This is a disciplinary proceeding under Sections 301.452(b) and 304.001, Texas Occupations Code. Respondent, DORMA BRANDON BRONES, is a Registered Nurse holding license number 577114, which is in current status at the time of this pleading, and a Vocational Nurse holding license number 123716, which is in inactive status at the time of this pleading.

Written notice of the facts and conduct alleged to warrant adverse licensure action was sent to Respondent at Respondent's address of record and Respondent was given opportunity to show compliance with all requirements of the law for retention of the license prior to commencement of this proceeding.

CHARGE I.

On or about June 8, 2005, while utilizing her Texas Registered Nurse license and working under her multi-state licensure privilege with Medical Contracting Services, Inc., Dallas, Texas, and on assignment at Delta Regional Medical Center, Greenville, Mississippi, Respondent engaged in the intemperate use of Oxazepam, Codeine and Morphine, in that she produced a specimen for a drug screen which tested positive for Oxazepam, Codeine and Morphine. Possession of Oxazepam, Codeine and Morphine without a valid prescription is prohibited by Chapter 481 of the Texas Health & Safety Code (Controlled Substances Act). The use of Oxazepam, Codeine and Morphine by a nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patients' conditions, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.

The above action constitutes grounds for disciplinary action in accordance with Section 301.452(b)(9) & (10), Texas Occupations Code, and is a violation of 22 TEX. ADMIN. CODE §217.12(5) & (10)(A).

CHARGE II.

On or about November 21, 2006, through present, Respondent may lack fitness to practice nursing as indicated by the results of a forensic psychological evaluation performed by Rion Hart, Ph.D. Dr. concluded that until Respondent "receives whatever treatment as indicated by a psychiatrist, [he] could not conclude that [Respondent] would be able to consistently behave in accordance with Board Rules."

The above action constitutes grounds for disciplinary action in accordance with Section 301.452(b)(10) & (12), Texas Occupations Code, and is a violation of 22 TEX. ADMIN. CODE §217.12(5).

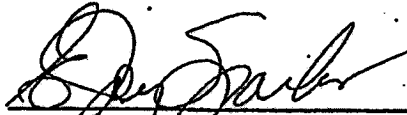

NOTICE IS GIVEN that staff will present evidence in support of the recommended disposition of revocation of Respondent's license to practice nursing in the State of Texas pursuant to the Board's rules, 22 TEX. ADMIN. CODE §§ 213.27 - 213.33. Additionally, staff will seek to impose on Respondent the administrative costs of the proceeding pursuant to § 301.461, TEX. OCC. CODE ANN. The cost of proceedings shall include, but is not limited to, the cost paid by the board to the State Office of Administrative Hearings and the Office of the Attorney General or other Board counsel for legal and investigative services, the cost of a court reporter and witnesses, reproduction of records, board staff time, travel, and expenses. These shall be in an amount of at least one thousand two hundred dollars (\$1200.00).
