Executive Director of the Board

BEFORE THE TEXAS BOARD OF NURSING

In the Matter of § AGREED ORDER
Registered Nurse License Number 816456 § FOR
issued to JOANN ALONZO JANDUCAYAN § KSTAR PILOT PROGRAM

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of JOANN ALONZO JANDUCAYAN, Registered Nurse License Number 816456, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may be subject to discipline pursuant to Section 301.452(b)(13), Texas Occupations Code. Respondent waived notice and hearing and agreed to the entry of this Order approved by Katherine A. Thomas, MN, RN, FAAN, Executive Director, on December 21, 2017.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and agreed to the entry of this Order.

3. Respondent's license to practice as a professional nurse in the State of Texas is in current status.
4. Respondent received a Baccalaureate Degree in Nursing from Brokenshire College, Davao City, Philippines, on March 31, 1998. Respondent was licensed to practice professional nursing in the State of Texas on March 29, 2012.
5. Respondent's nursing employment history includes:

4/2012-5/2015	Registered Nurse	St. David's North Austin Medical Center Austin, Texas
---------------	------------------	--

Respondent's nursing employment history continued:

5/2015-8/2017	Registered Nurse	Seton Medical Center Williamson Round Rock, Texas
9/2017-Present	Registered Nurse	THR Presbyterian Dallas, Texas

6. At the time of the incident, Respondent was employed as a Registered Nurse with Seton Medical Center Williamson, Round Rock, Texas, and had been in that position for two (2) years and one (1) month.
7. On or about June 1, 2017, while employed as a Registered Nurse with Seton Medical Center Williamson, Round Rock, Texas, Respondent failed to timely notify the physician when Patient Number 7003013, who was status post decompressive craniectomy with the placement of an external ventricular drain, experienced critically high intracranial pressure (ICP), and instead informed the physician approximately two (2) hours later. Subsequently, the physician ordered diuretic medication and the patient underwent a stat computerized tomography (CT) scan, which revealed extensive frontal intracerebral hemorrhage. Respondent's conduct exposed the patient to a risk of harm from a delay in necessary interventions to address the high pressure around the patient's brain.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that during report on this patient, she saw that the ICP was high so she asked the nurse if she had called the doctor since the patient came from the operating room in the afternoon, and the nurse told her that the patient's ICP was high since returning and she was trying to sedate the patient first. Respondent states that immediately after report, which took forty-five minutes, she assessed the patient and saw that he was grimacing, his muscles were tense, he was over-breathing the ventilator and his blood pressure and ICP were high. Respondent states that based on her assessment, the patient was in pain and not well sedated, so she increased the fentanyl drip, elevated the head of the bed over 30 degrees, and went to get the propofol to start the drip as ordered. Respondent states she was then called to her other patient's room so she went in there and it was about 20 minutes until she was able to come back. At that time, Respondent states that the ICP was still high even though the patient was well sedated and not showing signs of pain, so she called the doctor. Respondent states that in hindsight, she should have stopped report and called the doctor because the day shift nurse said she had not called the doctor since the patient arrived in the intensive care unit from surgery. Respondent states that she believes that she intervened appropriately, though there was a failure to timely notify the physician due to factors such as several interruptions during hand off report and during her care of the patient.
