

Respondent's nursing employment history continued:

1995 - 2000	Charge Nurse	Bryan Manor Dallas, Texas
12/2000 - Present	Charge Nurse	Brentwood Place Two Dallas, Texas

6. At the time of the incident in Finding of Fact Number Seven (7), Respondent was employed as a Charge Nurse with Brentwood Place Two, Dallas, Texas, and had been in that position for sixteen (16) years and seven (7) months.
7. On or about July 22, 2017, while employed as a Charge Nurse with Brentwood Place Two, Dallas, Texas, Respondent failed to ensure the proper performance of cardiopulmonary resuscitation (CPR) on Resident TJ when the resident was found unresponsive in that she didn't speak out that the resuscitation bag was not connected to the resident's tracheostomy for rescue breathing when it was determined that the resident was not breathing. In addition, Respondent failed to use the Automated External Defibrillator (AED) when there was no pulse after rounds of CPR compressions. Emergency Medical Service (EMS) were called, and the resident was pronounced dead. Respondent's conduct was likely to injure the resident from lack of appropriate nursing care, including possible demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the Registered Nurse (RN) directed others involved in the CPR, and directed Respondent to focus on chest compressions while the Certified Nursing Assistant (CNA) was directed to focus on ventilation. Respondent indicates that the RN said that the resident's chest wasn't rising. Respondent relates it was most likely due to the ambu bag mask being on the mouth/nose, rather than on the trach tube. Respondent explains it wasn't her role to ensure that the rescue bag was connected to the resident's trach for rescue breathing, that she couldn't have done both compressions and rescue breathing, and she can't be held responsible for not performing CPR properly. Respondent indicates that when there's not a facility policy that explicitly details the person who would be responsible for directing others in a Code Blue, confusion can result, and rescuers aren't sure whether to abide by their own knowledge, or trust a more educated team member. Respondent indicates that the facility's policy regarding AED use required an order by the physician, which was not in the resident's records. Respondent explains that the patient didn't have a witnessed sudden collapse, and it's unknown for how long the patient had been without spontaneous respirations, making the possibility of successful resuscitation very unlikely regardless of what measures were taken.
