05/05 - present	Unknown	

6. At the time of the initial incident, Respondent was employed as a vocational nurse with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, and had been in this position for approximately three (3) months.
7. On or about February 12, 2005, while employed with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, Respondent asked a Certified Nurse Aide (CNA) to administer an Albuterol treatment to Resident MH when said CNA was unlicensed to administer such treatment. Respondent's conduct was likely to injure the patient in that a Certified Nurse Aide lacks the necessary training, competency, and skills to perform these tasks, and Respondent exposed the patient to the risk of harm.
8. Respondent states that she never asked the Certified Nurse Aide (CNA) to administer the treatment, nor did she give the medication to the CNA for her to administer the treatment. Respondent states she was testing the CNA's response because the CNA was later going to be tested in order to become a Certified Medication Aide (CMA).

9. On or about February 12, 2005, while employed with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, Respondent left medications at the bedside of a resident and left the room before she ensured the resident took the medications. Respondent's conduct was likely to injure the resident in that failing to verify that the medication were taken by the resident could have resulted in nonefficacious treatment.
10. On or about February 13, 2005, while employed with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, Respondent failed to initiate appropriate, timely, and complete emergency interventions, to include activation of the 911 Emergency Management System when Respondent was made aware that Resident W.E. was in respiratory distress. Respondent's failure to assess and intervene unnecessarily exposed the patient to the risk of harm from complications due to respiratory distress.
11. Respondent states that she was told there was no change in condition for Resident W.E. Respondent states that when she performed her rounds, she noticed that the resident was having some respiratory difficulty. Respondent states she immediately called the RN Supervisor, who stayed with the resident until the end of her shift. Respondent states that the supervisor was in the room most of the day and only left periodically. She took responsibility for this resident during the time she was on duty. Respondent states when the RN supervisor was going off duty she advised Respondent that there had been no change in Resident W.E.'s condition during the shift and told Respondent to "use comfort measures" and continue observing. Respondent states she did not notice any further deterioration or any changes that would have required emergency transport during her shift.
12. On or about April 17, 2005, while employed with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, Respondent administered Vistaril to Resident IE without a physician's order and falsified the physician's order and/or documentation thereof, in Resident IE's medical record. Subsequently, the resident suffered an allergic reaction. Respondent's conduct was likely to injure the patient in that the administration of Vistaril without a physician's order could result in the patient suffering from adverse reactions.
13. Respondent states that on April 16, 2005, she received an order for IM Atarax to help alleviate Resident IE's hysteria. It was reported to Respondent that this Resident was threatening to hit other residents and was getting the other residents upset and starting fights. The medication was administered and the resident responded favorably. Respondent states that on the night of April 17, 2005, Resident IE had the same problems with hysteria and was threatening the staff and other residents. Respondent states that the Nurse Practitioner was called. Another order for the same medication was received. The resident was observed for more than eight (8) hours after the injection and no adverse reaction was noted. The nurse aides did not report any problems during the shift and she did not notice any adverse effects. Respondent states that the shift was busy and she failed to document the verbal order on her shift. Respondent states that the next morning she made the entry immediately upon entering the unit. At that time, Respondent states she was told that there was an adverse reaction (on

right upper arm) from the medication the night before. Respondent states it was only after being advised that there was an adverse reaction possibly due to the Atarax that the nurse practitioner denied issuing the order for the patient.

14. On or about April 18, 2005, while employed with Alvarado Meadows Rehabilitation Center, Alvarado, Texas, Respondent failed to assess a resident's blood pressure before giving them blood pressure medication. Respondent's conduct was likely to injure the resident in that failing to assess the resident unnecessarily exposed the resident to a risk of harm.
